

Electronic Drain Valves

The Ingersoll Rand Electronic Drain Valve (EDV) is a full-feature automatic electronic solenoid drain valve that cost-effectively removes condensate from compressors, receivers, dryers, aftercoolers, filters and drip legs. Each EDV includes an electric drain, manual blowdown valve, and a strainer/ball valve, which prevents debris from clogging the drain valve.

Features

- Prevents rusting
- Eliminates manual draining
- Maximum pressure of 17.3 bar (250 psi)
