SEDA Dismantling Tools

Stackable Enginebox Engine Table

Stackable Engine Box – Special pallet for the storage of car engines

With this stackable engine box, engines can be transported and stored easily and efficiently and comes standard with its own built in catchment area that can hold up to 30 litres. Corner and side bars are removable for efficient storage when empty. Transverse bars are used for additional security. The boxes are designed so they can be stacked up to 3 boxes high. (No rack storage necessary!)

Engine Table

The workstation allows for easy dismantling of complete engines. The manual 360 ° rotating table allows the operator to carry out the dismantling operation without having to moving the engine around. The table is equipped with a integrated catchment area with a galvanized steel grating to collect fluids. Additional locking pins allow you to fix the optional stackable engine box to the table.

Your benefits

- ✓ More efficient engine disassembly and storage

TECHNICAL DETAILS – Engine Box

Weight: 80 kg
Capacity: 2-4 engines
Size: 1290 x 1190 x 960 mm

TECHNICAL DETAILS – Engine Table

Max. weight: 600 kg
Size: 1200 x 1100 mm
