

World leader in vehicle de-pollution technology

SEDA Dismantling Line PLANT FACILITY

Complete
recycling center

Your benefits

- ✓ Marketable large solution
- ✓ Completely from one source
- ✓ In use worldwide
- ✓ Complete
 - Planing
 - Organisation
 - Realisation

Re-source Engineering Solutions, French market leader in car-recycling for dismantling lines and SEDA Umwelttechnik GmbH, leading manufacturer of end-of-life vehicle drainage technologies, developed a complete solution for plant facilities.

Solutions of such a magnitude are intended for companies with dismantling rates of **5.000** up to **18.000** vehicles per year.

Complete dismantling line

Cooperation partner:

World leader in vehicle de-pollution technology

Productivity through line work

SEDA Dismantling line FACILITY PLANT

Complete Recycling center

The process is more eco-friendly, safer, more efficient and cleaner - in other words industrial suited. As a dismantling line or an isolated solution, the facility plant is feasible in various stages of expansions.

Re-source and SEDA participated in several European eco-design-studies and developed new innovative possibilities to recycle car parts and raw materials of end-of-life vehicles, together with automobile manufacturers and suppliers.
