

World leader in vehicle de-pollution technology

SEDA FuelManager S-31130 | S-31135

The new SEDA FuelManager is the optimal solution for decontaminating otherwise potentially useless rusty, oily or moisture rich fuel into clean and valuable fuel. Maximize your returns from scrap cars by investing in a FuelManager.

Your benefits:

- ✓ Suitable for Petrol or Diesel
- ✓ Water separation
- ✓ Easy operation
- ✓ Cleans fuel storage tanks
- ✓ Compact dimensions
- ✓ Integrated filter units
- ✓ Turns water mixed fuel into a profitable product

Previously useless water contaminated fuel is transformed into valuable petrol or diesel. An integrated ATEX approved pump and dispensing unit allows the easy transfer of clean filtered fuel to the fuel tanks of your vehicle fleet.

World leader in vehicle
de-pollution technology

SEDA FuelManager

S-31130 | S-31135

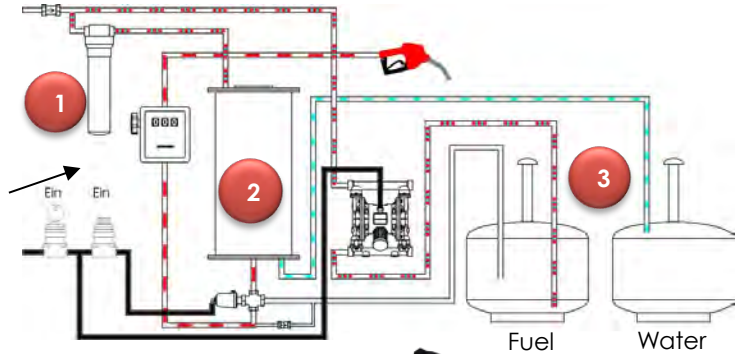

Fuel-water-separation
with refuelling system

Refuelling scheme:

Simple to use in 3 ways:

- A: Drainage
- B: Refuelling
- C: Cleaning

The first filter (1) separates even the tiniest particle from reclaimed fuel while the second main filter (2) removes all traces of moisture. Both water and newly cleaned fuel are separated and channeled to separate tanks (3).

Your benefits:

- Quick filling process
- 2 Displays (overall score and resettable counter)
- Only authorized person with key can use it
- Automatic filling function for a standalone filling
- Big door for easy maintenance
- Neatly organized 3 meter hose
- Immediate control of filter pollution
- Explosion proofed pump with ATEX-certification
- Neatly arranged running of cables for easy install
- Little space required

WaterSeparator single

TECHNICAL DETAILS

Width:	900 mm
Depth:	620 mm
Height:	2500 mm
Weight:	230 kg
Fill capacity:	70 liters
Throughput drainage:	30 liters/min
Throughput cleaning:	15 liters/min
Throughput filling:	15 liters/min
Hose length:	2500 mm
