

World leader in vehicle de-pollution technology

SEDA MultiPlex 52660

Safe triggering of airbags

The new SEDA MultiPlex is used to trigger all pyrotechnic components in vehicles.

The MultiPlex is suitable for all vehicle-types. Universal pin-cables allow the connection of the device to different vehicle-control units. Additional adaptors are not necessary. The device is supplied with power through a standard-battery or via cable connection (with a car battery). With the help of a control element, which displays all present airbags, all pyrotechnic parts can be triggered via 2-finger-safety system.

For recyclers, who already use the SEDA AirbagMaster, we recommend the MultiPlex upgrade-set. In that case the AirbagMaster is reused as control element. The MultiPlex components replace the previously required AirbagMaster-adaptors.

Battery version

Cable version

UPGRADE-OPPORTUNITY

Compatible with SEDA AirbagMaster

MULTIPLEX COMPLETE-SET

Set with SEDA MultiPlex, 2 cable sets, control element, connections & case.

Versions:

- 52660-AK** Battery-version incl. charging device
- 52660-ST** Cable-version with power supply via car battery

AIRBAGMASTER UPGRADE

Upgrade-set with SEDA MultiPlex, 2 cable sets, connections & case.

Versions:

- 52661-AK** Battery-version incl. Charging device
- 52661-ST** Cable-version with power supply via car battery
