

World leader in vehicle de-pollution technology

SEDA VehicleDismantling Platform

Car tilting device

+ Your benefits:

- ✓ Hydraulic control system
- ✓ For easy and ergonomic working on car bottom
- ✓ Mobile platform for easy placement
- ✓ Additional tools can be integrated on swingarm
- ✓ Rugged and robust
- ✓ Proven SEDA Quality Product

Dismantling companies need equipment which support their work process. The new SEDA VehicleTiltingRamp moves the car, not the worker.

It is easy to place a car onto the system. Secured by a hydraulic safety arm on the top, the car is ready to turn 90° in order to help a worker to stand upright and work on the bottom of the vehicle easily. This unit offers a safe and efficient dismantling of ELVs. Once tried you will never want to work without it!

This device combined with a platform and our dismantling swingarm offers you more ways to work in a highly professional and industrial way.

The platform can be moved to different locations.

Navigation:

„View online demo video on our website: www.seda.at“

Step 1:
Place the car

Step 2:
Secure the car

Step 3:
Turn the car
