## SEDA VehicleTrolley

N-527480

### Accessoires Special tools

The new SEDA VehicleTrolley ensures easy movement of vehicles into a desired working position.

Thanks to simple handling, just a single worker is able to maneuver a vehicle in place. Consequently this trolley offers more mobility and flexibility within a recycling workshop or garage.

Once placed on the trolley a forklift is no longer needed to move a vehicle around the working area. The robust construction, with four sturdy wheels (incl. wheel-lock) as well as the optimal size, that fits with almost all common cars, show the advantages of the SEDA VehicleTrolley.

Easy to navigate

Electric Pallet Truck

Single Lifting Ramp

Alternative to a forklift

### + Your benefits:

No fork lift is necessary to move and load the ELV in a working position

Fast movement of vehicles

Easy to move by a single person

Fits with all common car types

Solid wheels with stop mode

Can be used on vehicle or lifting ramp

Easy transport with fork lift

Handy size
