# WHO WE ARE

**ELV Select Equipment** provides solutions for improving your current procedures within various recycling or waste industries.

With over 35 years of automotive, metal & waste recycling experience, we understand the challenges of an Industrial environment and the importance of a profitable process.

# OUR COMMITMENT

Through partnerships with top brands, ELV Select Equipment provides a variety of products to service in the recycling industry:

**SEDA** International is a world leader in ELV decommissioning equipment and Electric Vehicle (EV) decommissioning

\* CANADIAN DISTRIBUTOR

**Taurus** offers product lines of powerful pre-shredders, shears and balers

\* NORTH AMERICAN DISTRIBUTOR (MASTER DISTRIBUTION AGREEMENT)

**CMB** is a line of hydraulic attachments for the demolition and handling of waste materials

\* NORTH AMERICAN DISTRIBUTOR (MASTER DISTRIBUTION AGREEMENT)

**Ecohog** supplies a line of machines for any various down stream separation operations, to complete the lifecycle of recycling

\* NORTH AMERICAN DISTRIBUTOR (MASTER DISTRIBUTION AGREEMENT)

We also distribute a comprehensive line of **Compressed Air Solutions**, from compressors to driers, filtration and so much more to enhance production and reduce downtime in a variety of industrial applications

# SERVICES

ELV Select Equipment utilizes a network of North American distributors to ensure you aren't just investing in a product, but in a process.

At ELV Select Equipment our services include helping you pinpoint what products best suit your needs, building a process plan that will be the most profitable for your business and constantly serving you after the sale has been made.

# WELCOME TO ECOHOG

Ecohog is a family-owned equipment manufacturer located in Co Tyrone, Northern Ireland, the capital of engineering. Operation in a global scale we have over 20 years' experience supplying equipment to the waste and recycling sector. Through extensive market research, development and concept design in finding solutions to waste sorting problems, we have developed the Ecohog Windshifter and Metal Recovery Ranges, some of the most efficient separation technology in today's market.

## WHY ECOHOOG?

The Ecohog product range has been designed for both mobile and static installations incorporating low energy consumption, low noise levels, and low dust emissions whilst meeting the latest law regulations and promoting the environment at a more affordable price. We Pride ourselves, that using our extensive experience and knowledge of the industry, each Ecohog unit is a custom tailored to accommodate the customer's specific needs and process requirements.

### OUR MISSION

Ecohog are Hungry for Waste, helping the recycling world through customer focused, cost-effective technology.
