Airbag Preparation Table

The connection to the airbag that needs to be neutralized happens behind a safe inspection window, which specifically protects the upper body area.

The SEDA AN-P Airbag preparation table is specially designed to protect the worker while preparing pyrotechnic components of vehicles.

This device has a high level of stability as it's secured to the floor and is ESD safe in combination with the Airbag Neutralization Cabinet.

The working surface is fixed with magnets which can fold down in case of accidental detonation of the airbag to absorb any upward energy.

Your benefits:

- Danger minimization during preparation
- Safety glass
- Secured to the floor
- Antistatic

TECHNICAL DETAILS

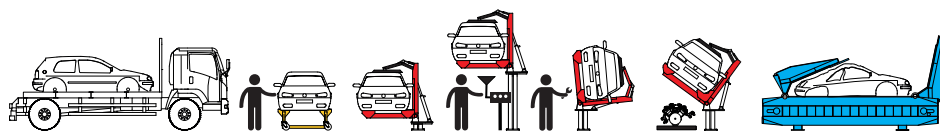

Dimensions: 860 x 600 x 1700 mm
Weight: approx. 75 kg
Optional power supply for light over the ANC

ORDER INFORMATION

N-52696 SEDA AN-P
Airbag worktable
Optional:
N-52698 Stacking bin
Alternative:
N-52687 SEDA Antistatic Set
