

World leader in vehicle de-pollution technology

## SEDA HV E-CAR Safety Container N-527738

Safe electric car storage and transportation

Rolling platform remote control

### Your benefits:

- Roll-on roll-off container for easy transportation and storage of cars and Li-ion batteries
- Extendable rolling platform chain driven
- Remote control operation
- Viewing window giving visibility into the interior
- Water mist nitrogen cooling

The SEDA Electric Vehicle Safety Container serves to prevent and protect against undefined dangers from defective electric vehicles or batteries.

With the 20 foot roll-on roll-off container for the recovery, transport and storage of electric vehicles, all safety requirements are met exactly for ADR compliance. As all electric vehicles and vehicles with dangerous energy sources or self-igniting components must be transported safely to an electric vehicle specialist.

The extendable rolling platform that is chain driven can be operated easily via remote control.

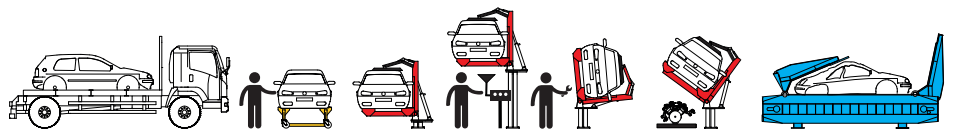

In order to prevent the flammable atmosphere, the container is equipped with a water mist nitrogen cooling system. This enables the reaction of Li-ion batteries to be cooled while driving or at the parking space, without a water connection or the fire brigade having to be available.

Operation of the retractable, chain driven rolling platform using remote control
