de-pollution technology

## SEDA HV Lifting Table N-527706

Safe removal and easy transporting  
of heavy HV batteries

### Your benefits:

- The table has up to 1.400 kg payload
- Easy to handle and safe to operate
- Tilttable
- "Split function" allows to separate components (such as engines and transmissions) to access inner parts
- High ground clearance allows perfect positioning of workshop crane
- Adjustable lift range from max 1,815 mm to min 580 mm
- Powered by compressed air, many useful features, ease of use

SEDA HV Lifting Table (powered by compressed air) is used to safely remove HV batteries and transport them to a battery dismantling or storage area. It is a lifting table with a "split function" for special configurations (with a compressed air-operated hydraulic pump). SEDA HV Lifting Table is equipped with a spring-loaded safety system and has 1400 kg load limit.

### TECHNICAL DETAILS

|                        |                                   |
|------------------------|-----------------------------------|
| <b>Dimension:</b>      | 977 x 1806 x 810 mm               |
| <b>Weight:</b>         | 628 kg                            |
| <b>Loading weight:</b> | 1,400 kg                          |
| <b>Min. height:</b>    | 580 mm                            |
| <b>Max. height:</b>    | 1.835 mm                          |
| <b>Requirements:</b>   | 5-10 bar<br>(nominal value 7 bar) |
